Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Mollborn Fredrik (Registration number: 48, 587), on 3/1/2005.

3. The application has been amended as follows:

In the claims:

(i) Delete claims 2, 20 and 38.

(ii) Replace claim 1:

1. A computerized method of managing resource usage by one or more resource entities, wherein each resource entity is configured to represent an entity that consumes one or more resources, the method comprising:

in an object-based computing system, continuously determining by a resource manager with which each resource entity is registered whether a resource has reached a critical level;

when it is determined that a resource has reached a critical level, selecting by the resource manager, a first resource entity based on one or more criteria, wherein the one or more criteria include a priority value for each resource entity

and wherein the selected resource entity has a relatively lower priority than other one or more resource entities that are not selected; and

when it is determined that a resource has reached a critical level, requesting by the resource manager that the selected resource entity to change its resource consumption state to a more restrictive state by performing the request through a list to which a plurality of resource entities are registered.

iii) Replace claim 13:

13. A method as recited in claim 1, wherein the list is a ResourceNotificationList.

iv) Replace claim 19:

19. A computer readable medium containing computer code having instructions for managing resource usage by one or more resource entities, wherein each resource entity is configured to represent an entity that consumes one or more resources, the computer readable medium comprising:

computer code for continuously determining by the resource manager with which each resource entity is registered whether a resource in an object-based computing system has reached a critical level;

computer code for selecting by the resource manager, a first resource entity based on one or more criteria when it is determined that a resource has reached a critical level, wherein the one or more criteria include a priority value

for each resource entity and wherein the selected resource entity has a relatively lower priority than other one or more resource entities that are not selected; and
computer code for requesting by the resource manager that the selected resource entity change its resource consumption state to a more restrictive state when it is determined that a resource has reached a critical level by performing the request through a list to which a plurality of resource entities are registered.

v) Replace claim 31:

31. A method as recited in claim 19, wherein the list is a ResourceNotificationList.

vi) Replace claim 37:

37. A object-based computer system operable to manage resource usage by one or more resource entities, wherein each resource entity is configured to represent an entity that consumes one or more resources, said object-based computer system comprising:

a memory; and

a processor coupled to the memory, wherein at least one of the memory and the processor are adapted to provide:

select a first resource entity based on one or more criteria, when it is determined that a resource has reached a critical level, wherein the one or more criteria include a priority value for each resource entity and

Art Unit: 2127

wherein the selected resource entity has a relatively lower priority than other one or more resource entities that are not selected; and
request the selected resource entity to change its resource Consumption state to a more restrictive state when it is determined that a resource has reached a critical level by performing the request through a list to which a plurality of resource entities are registered.

4. Pursuant to MPEP 606.01, the title has been changed to read: - -
RESOURCE MANAGING SYSTEM FOR CHANGING RESOURCE
CONSUMPTION STATE OF THE LOWER PRIORITY RESOURCE ENTITY TO
MORE RESTRICTIVE STATE WHEN RESOURCE REACHED CRITICAL
LEVEL - -.
